WARNING: This book is not one of those 30-day-body transformation or Lose 10 pounds in 2 weeks guides. If you are looking for a quick fix, then please look elsewhere! Maybe you've tried one of those programs (haven't we all) and let me guess what the results were....NADA! Those are just plain full of junk with attractive titles so that the magazines can sell more copies. Now, if you are looking for a way to slowly but surely lose weight in a healthy manner, then keep on reading. I prefer being honest: Transforming and your body is a steady process and it will take time. You can supercharge your results by following the guidelines laid out in this book though! I am going to share some real, true & tried methods with you that do only one thing - work. In this book you will learn: Why walking is the best activity you should start doing right now Why walking outruns running when it comes to weight loss How to prepare yourself to guarantee success in the long term How you can get started off on the right foot About the best kind of shoes you can wear for walking How to create and maintain new habits using three incredibly simple and effective steps Why you must master the power of patience How you can get and stay motivated Common mistakes people make that you can easily avoid How, when and what you should eat to lose weight And much more!
