

## SPInvoice Explained (Understanding SharePoint Journal Book 2)

SPInvoice Explained is an advanced SharePoint developer issue that focuses on teaching good SharePoint development concepts to experienced developers. The solution SPInvoice is a training solution only, built to teach these concepts, using a mock but realistic software product. In this issue, you'll learn advanced SharePoint development concepts such as building solutions that upgrade across SharePoint versions, understanding custom configuration options in SharePoint, developing advanced user experiences with delegate controls and state management, building rapid taxonomy solutions, and creating advanced user interfaces using jQuery and SPServices. In addition to these concepts, SPInvoice Explained covers supporting techniques such as solution structure and organization, property bags and other configuration features, configuring features and solutions with feature receivers, ASP.NET development, including custom controls and in-line code, and migrating traditional HTML layout to SharePoint. SPInvoice Explained also shows how to build compelling forms solutions without the use of InfoPath.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
