

# Master Your Life With NLP: The Easy To Understand Guide To Neuro Linguistic Programming

Neuro Linguistic Programming is a body of methods based on the presupposition that all behavior has a structure that can be modeled, learned, taught and changed. Neuro stands for the nervous system and the way in which our external experiences are received and processed through the five senses. Linguistic is for the verbal communication system through which our neural experiences are coded, ordered and given meaning. Programming is the ability to discover and utilize the programs that we run in our neurological systems to achieve desired outcomes. NLP will take you on a journey of self-discovery. The techniques in this book will provide you with a true leading edge in understanding yourself and others in any context. My goal here is to present Neuro Linguistic Programming in an easy to understand format, so that you can begin making changes in your life immediately.
