

The Dark Net

Beyond the familiar online world that most of us inhabit lies a vast network of sites, communities and cultures where freedom is pushed to its limits. A world that is as creative and complex as it is dangerous and disturbing. A world that is much closer than you think. The Dark Net is a revelatory examination of the internet today, and of its most innovative and dangerous subcultures, stretching from secret Facebook groups to the encrypted and hidden Tor network. In it, Bartlett goes in search of the people behind the screen, meeting trolls and pornographers, drug dealers and hackers, political extremists and computer scientists, Bitcoin programmers and self-harmers, libertarians and vigilantes. Based on extensive first-hand experience, exclusive interviews and shocking documentary evidence, The Dark Net offers a startling glimpse of human nature under the conditions of freedom and anonymity, and shines a light on an enigmatic and ever-changing world.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
