E-mail, e-marketing, e-commerce, e-business, and e-communities - just a few years ago, having a presence on the Web was considered innovative. Today, a Web presence is not only innovative; its imperative. With the advent of home banking, package tracking, order entry, order status inquiry, and other customer services, a business without a Web strategy will soon be out of business.Driven by the needs of e-commerce, Web-to-Host Connectivity demonstrates how to connect legacy systems and databases to the Web and describes the technologies needed to do it. It provides comprehensive coverage of web-to-host solutions and technologies in addition to security, server, network and system management usage. This book places an emphasis on improving data access and data exchange, no matter where it resides.

Posted: July 26, 2016 in Cheating, Education, Evil, Politics, Religion, Social Issues Tags: Armageddon, bible, Christianity, Conspiracy theory, Prophecy, Y2K 0 end of days   Some temptations are just to good to pass up. My curiosity got the best of me the other day and I gave in by watching one of those â€œEnd of the Worldâ€ conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are â€œsavedâ€ will rejoice in the heavens.
