

The Plugged-In Professor: Tips and Techniques for Teaching with Social Media (Chandos Publishing Social Media Series)

New technologies are transforming the way students work. The Plugged in Professor provides a timely and exceptional resource for using social media and other new technologies to help college students meet both general and discipline-specific objectives. The title covers techniques built around well-known social networking technologies, as well as other emerging technologies such as mobile phone and tablet apps. With a practical focus and reader-friendly format, this book shows educators how to apply techniques in each technology, and includes clear student learning objectives, step-by-step directions, observations and advice, and supplemental readings and resources. Twenty-five chapters by leading contributors cover key aspects of new technologies in education, in four parts: Writing, research and information fluency; Communication and collaboration; Critical thinking and creativity; and Integrative learning. Provides a cutting-edge resource for academics and practitioners in effective ways of reaching today's students through the use of their favourite tool, social media. Outlines a range of strategies taking advantage of the unique learning styles and habits of net generation learners. Exposes students to ways in which these technologies can be used in their professional and personal lives.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
