

The Longhorns

The Texas Longhorn made more history than any other breed of cattle the world has known. These wiry, intractable beasts were themselves pioneers in a harsh land, moving elementally with drouth, grass, Arctic blizzards, and burning winds. Their story is the bedrock on which the history of the cow country of America is founded. J. Frank Dobie was a tale spinner who appreciated the proper place of legend and folklore in history. In *The Longhorns*, he tells of the Spanish conquistadors, who brought their cattle with them; of ranching in the turbulent colonial times; of the cowboy, whose abandon, energy, insolence, and pride epitomized the booming West. He writes of terrifying stampedes, titanic bull fights on the range, ghost steers, and encounters with Indians. A tireless prospector of the history and legends of the Southwest, Dobie spent most of his life preparing to write this book. He was born in the Texas brush country where the Longhorns made their last stand; he back-trailed them into Mexico; he pursued the vivid lore of Texas cowboys and Mexican vaqueros. No historian or naturalist has ever so related an animal to the land, its people, and its history.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
