

## Reviews in Computational Chemistry, Volumes 1 - 23 Set

The Reviews in Computational Chemistry series brings together leading authorities in the field to teach the newcomer and update the expert on topics centred around molecular modelling, such as computer-assisted molecular design (CAMD), quantum chemistry, molecular mechanics and dynamics, and quantitative structure-activity relationships (QSAR). The series contains updated and comprehensive compendiums of molecular modelling software that list hundreds of programs, services, suppliers and other information that every chemist will find useful.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
