

# Evaluating the Reliability of Emergency Response Systems for Large-Scale Incident Operations (Rand Corporation Monograph)

The ability to measure emergency preparedness is critical for policy analysis in homeland security. Yet it remains difficult to know how prepared a response system is to deal with large-scale incidents, whether it be a natural disaster, terrorist attack, or industrial or transportation accident. This volume describes a method, based on the concept of system reliability, for evaluating the preparedness of emergency response systems.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
