

Women, Work and Computing

It has been suggested that the ideal worker for occupational computing is now the hybrid--someone with excellent interpersonal as well as technical skills. It has also been suggested that women, because of their historical relationship with such skills, find themselves faced with a golden opportunity in computing. A further claim that computers can provide women with additional opportunities insofar as they provide changes in gender consciousness has also been mooted. Via the exploration and analysis of new qualitative evidence this book assesses the likelihood of these opportunities being realized.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
