

Tales of the Outer Planes (Advanced Dungeons & Dragons, Module OP1)

Tales of the Outer Planes is an anthology of short adventures set throughout the many Outer Planes for use with the AD&D Manual of the Planes. Some of gaming's best designers have contributed adventures to this set, which includes scenarios set in the Seven Heavens, Olympus, the four Elemental Planes, the Nine Hells, and the Astral and Ethereal Planes. Tales of the Outer Planes is a perfect collection for powerful characters who have it too easy at home and are looking for new challenges. Many of the most fearsome monsters are even more dangerous on their own planes - can you take them on and live to tell the tale?

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
