According to Gartner, the consulting firm, in 2016 The total value of the world market of Cloud services will amount to 131 billion \$. If we add, except for the above two information, the global trend of the data migration, computational power and software from stationary and mobile equipment to Cloud, we can be sure that we live in the era of Clouds. Not being conscious of that we often take advantage of Cloud services through placing photos in Flickr, or collecting music in Deezer, storing books in iBook, mail in Gmail, or the content of the electronic archive in Dropbox. All these and similar services provide remote, shared, synchronized access to our data, favorite applications and computational power. Paraphrasing words of Gordon Gekko, from his film: ownership is not the most important thing, but access. So, When it comes to access... The Clouds Economy is a publication of the manual - guide character providing... access to unique knowledge and information about Cloud Computing. The book is one of the most synthetic compendia concerning the concept of Cloud Computing in a broad and comprehensive way from both the individual and business users perspective.
