

Coal Hollow: Photographs and Oral Histories (Series in Contemporary Photography, Vol. 4)

Coal is still king in much of Appalachia, yet the heritage and history of the people who enabled the United States to become an economic superpower in the Industrial age are slipping away. This remarkable book presents arresting black and white photographs and powerful oral histories that chronicle the legacy of coalmining in southern West Virginia. Ken and Melanie Light traveled hundreds of miles through rugged, isolated terrain recording the stories of a range of people whose lives were shaped by coal: retired miners, men and women who have been jobless their entire lives, a contemporary coal baron, a justice of the State Supreme Court of West Virginia, a writer who bravely ran for governor on a third party ticket, and people who returned to the hills when their lives failed elsewhere. What emerges is a complex portrait of people locked into an intricate web of geography, history, and unfettered profiteering. In Lights poignant images and in their own distinctive voices the residents of Coal Hollow a fictional composite of the communities the Lights surveyed reveal how the intersection of mountain culture and the greed of the coal companies produced the most powerful economy in the world yet brought crushing poverty to a region of once-proud people.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
