

# Unity Game Development Scripting

Write efficient C# scripts to create modular key game elements that are usable for any kind of Unity project. About This Book Write customizable scripts that are easy to adjust to suit the needs of different projects. Combine your knowledge of modular scripting elements to build a complete game. Build key game features, from player inventories to friendly and enemy artificial intelligence. Who This Book Is For If you are new to Unity scripting and want to learn simple and modular code and advance your knowledge to the next level, this is the book for you. What You Will Learn Include controls for both keyboard/mouse and the gamepad. Create three different types of expandable items. Implement an inventory that includes a hot key system. Optimize your games video and audio options. Integrate a GUI HUD with buttons, health bars, and damage reports. Make a complex AI system. Save game data in multiple styles. Track player statistics and scores. In Detail The intuitive and powerful Unity game engine is one of the most widely used and best loved packages for game development. Unity scripting is an essential but challenging skill to master in order to create custom game elements. Learning modular scripting allows you to rewrite as little code as possible as you deploy your scripts to multiple projects and work easier, quicker, and more efficiently than before. In each chapter of this book, you'll learn how to script new game elements. Beginning with making custom controls for the keyboard and mouse, as well as the Xbox 360 Controller, you'll then get to grips with more complex systems such as inventory, data saving, and artificial intelligence. As you create these elements, you'll also learn how to make your scripts simpler and easy to use. This will allow drag-and-drop deployment, which is to be used by designers and nonprogrammers. Finally, you'll combine all of your newfound skills

to create your own complete game project.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
