Its Africa, Stupid!: A corporate executives incredible story, secrets for doing business in Africa and how USA companies can best play catch up within the fastest growing continent.

No, the title is not intended to label anyone stupid. It is simply a way to get peoples attention to inform them of the business opportunities they are missing out on in Africa - while the USA and Europe continue with their economic challenges and lack of growth. The book covers Patricks very first trip to East Africa in 1985, what hes learned over the past three decades from living and doing business in Africa, including over a decade for a Fortune 500 company, and the proven path to business success there. It will also update readers on todays Africa and how the USA can play catch-up to China, and other countries, to gain some of the very lucrative business and investment opportunities in Africa.
