

Age, Class, Politics, and the Welfare State (American Sociological Association Rose Monographs)

This analysis of the growth of welfare spending examines the relative impact of class and status groups versus demographic composition and political structures. Special attention is given to the role of the aged as representative of the importance of ascription and middle-class groups in welfare growth, and to the effect of welfare spending on income inequality. Aggregate cross-national data from the UN, ILO, and the World Bank are analyzed and the conclusion is drawn that a large aged population, especially in combination with democratic political processes, is a direct and crucial influence on the level of welfare spending.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
