

## The Elements of Powerboat Design

The Elements of Powerboat Design makes available to the recreational boater the insight and methods of an accomplished naval architect. Roger Marshall walks the reader through the powerboat design process, from first choices such as hull type, to the subtle adjustments that create a comfortable interior or a beautiful hull. The organization of the book mirrors the design process itself. Chapter 1 addresses the fundamental question of how intended use dictates hull type. Powerboat hulls can be optimized for high speed through flat or rough water, for moderate speed with fuel efficiency, or for long-distance voyaging. Marshall explains what distinguishes a planning boat from a displacement boat, and examines the middle ground of semi-displacement hulls. Hull type leads directly to choices of engine and drive train (Chapters 2 and 3). These first determinations in turn influence building methods, performance, and the steering, mechanical, and electrical systems used aboard (Chapters 4-7). And together all of these elements contribute to - or detract from - the complex attributes known as safety, seaworthiness, performance, comfort, and beauty (Chapters 8-13).

NEWAGEOFTRUTH There's been too many lies and not enough truth stay updated via rss MY NEW PLAYLIST Why are some looking forward to the end of days? Posted: July 26, 2016 in Cheating, Education, Evil, Politics, Religion, Social Issues Tags: Armageddon, bible, Christianity, Conspiracy theory, Prophecy, Y2K 0 end of days Some temptations are just too good to pass up. My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
