

## IBM in Endicott

IBM is heir to all the ideas for innovative ciphering machines of the past. From granite blocks used to tell time, to beads used for accounting purposes, to punch cards, to computer chips as small as a raindrop, all are the historical roots of this corporate legend. IBM began with a small group of visionaries whose first factory was in a dismal garret in Binghamton, New York. By the time the Bundy Manufacturing Company relocated to Endicott, New York, it was part of the greatest industrial revolution in the world: the birth of computing technology. IBM in Endicott illustrates the development of a corporation and the people and ideas that made IBM a household word. With the city of Endicott at the epicenter of progress, IBM grew from a small company named Bundy Manufacturing, incorporated in 1889, to the company known as International Business Machines. Pictured are just a few of the notable moments during some of the golden years of Big Blue.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
