

OSCE Stations for Medical Finals Book 1

OSCE Stations for Medical Finals Book 1 is the first of an exciting series of books promoting a new approach to OSCE circuits. The aim of this new title is to prepare you for finals with common case-based scenarios that provide a broad cover of the curriculum. This title contains twenty scenarios which are subdivided into a number of sequential, interdependent tasks: history taking, examination, data interpretation, procedures and clinical therapeutics. Linking the tasks together promotes clinical diagnostic reasoning and the application and utilisation of knowledge and skills requiring you to think and act on the clinical information you have gathered in previous stations. These titles replace OSCEs for Medical Students Volumes 1-3
