

# Ethnopolitics in Cyberspace: The Internet, Minority Nationalism, and the Web of Identity

Defying predictions that the Internet would eventually create a world where nations disappeared in favor of a unified global village, the new millennium has instead seen a proliferation of nationalism on the Web. Cyberspace, a vast digital terrain built upon interwoven congeries of data and sustained through countless public/private communication networks, has even begun to alter the very fabric of national identity. This is particularly true among stateless nations, diasporic groups, and national minorities, which have fashioned the Internet into a shield against the assimilating efforts of their countries of residence. As a deterritorialized medium that allows both selective consumption and inexpensive production of news and information, the Internet has endowed a new generation of technology-savvy elites with a level of influence that would have been impossible to obtain a decade ago. Challenged nations—from Assyrians to Zapotecs—have used the Web to rewrite history, engage in political activism, and reinvigorate moribund languages. This book explores the role of the Internet in shaping ethnopolitics and sustaining national identity among four different national groups: Albanians outside of Albania, Russians in the near abroad, Roma (Gypsies), and European Muslims. Accompanying these case studies are briefer discussions of dozens of other online national movements, as well as the ramifications of Internet nationalism for offline domestic and global politics. The author discusses how the Internet provides new tools for maintaining national identity and improves older techniques of nationalist resistance for minorities. Bringing together research and methodologies from a range of fields, Saunders fills a gap in the social science literature on the Internet's central role in influencing nationalism in the twenty-first century. By creating new spaces for

political discourse, alternative avenues for cultural production, and novel means of social organization, the Web is remaking what it means to be part of nation. This insightful study provides a glimpse of this exciting and sometimes disturbing new landscape.

NEWAGEOFTRUTH There's been too many lies and not enough truth stay updated via rss MY NEW PLAYLIST Why are some looking forward to the end of days? Posted: July 26, 2016 in Cheating, Education, Evil, Politics, Religion, Social Issues Tags: Armageddon, bible, Christianity, Conspiracy theory, Prophecy, Y2K 0 end of days Some temptations are just too good to pass up. My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
