

## Yoga For Beginners: A Proven Guide For Practicing Yoga, Lose Weight, And Relief Stress!! (Yoga For Beginners: Yoga for Weight Loss, Poses, Relief Stress)

Yoga For Beginners: Learn How To Reduce Stress, Lose Weight, And More!!!

When someone mentions the word Yoga, the first thing that flashes our minds are people with weird and twisted positions and poses. Yoga do involves flexing of body and muscles which can be visually unpleasing but there is a heavenly experience that can only be felt by the performer. Yoga was evolved from Indian culture around 1000s of years age and the word is derived from Sanskrit word Yuj which means to bind or be disciplined. Yoga focuses on increasing the flexibility of the muscles and boosting the wellbeing and overall health of person. Yoga is now popular and is practised in more than 34 countries and has seen to be effective not only for the physical wellbeing of a person but also for improving the mental health. All the Yoga poses and exercises being practiced today is from the book called Yoga Sutra, written by Patanjali. The book was written around 2000 years ago and contains more 190 statements and physical as well as mental exercises. It is now used as a hand book for reference and guidelines while doing Yoga by both beginners and professionals. One of the most used and popular exercise of Yoga is Asana. This exercise is believed to eliminate all the dirt and evil things from the mind and thus purifying the body. Yoga always begins with the chanting of a word Om which is believed to be a special mantra. The word is said to be representing the vibration of the universe. Professional yogis have taught us that the universe itself is moving and creating a vibration and rhythm in a specific pattern which we are unable to hear in our daily lives. It is believed that when we chant Om, we are experiencing ourselves and taking a ride with the universe. Our soul will be experiencing the rumbling of leaves, anger of high tides, swift movements of wind and the rising of the sun. Yoga is very well different from

the regular stretches and exercises in many ways. For starters, yoga helps us to combine and sync both physical exercises and mental exercises. While we flex our muscles and movements we would be taking deep breaths slowly inwards. This will help us to flex, calm and purify the mind along with the body. There is no specific schedule to keep while practising yoga. Practicing only 20 minutes a day up to 3 times a week is perfect for beginners. As yoga becomes a habit you will find yourself spending more and more time, and also gradually yoga will become an inevitable part of your life. The only thing standing in between you and the gateway to purify your body and soul is yourself. To begin with yoga all you need is a curious mind. Yoga can be practised both at home by yourself or at a studio with the assistance of a professional yoga instructor. Track or tight fitting simple light weight outfit would be recommended for yoga. Yoga will be generally done on a yoga mat barefoot. Here Is A Preview Of What You Will Learn: In Yoga for beginners, you will learn, about what is yoga, why it is useful and when, where and how to do yoga?
