

Religion ... Scanned

Religion, despite the critics and the release of the criminal practices, is still seen as a beacon in time. This book shows the reader that the holy house, religion, is not as sacred as one wants you to believe. Now the time has faded and the sacred religion will increasingly be questioned as people wonder if there are other roads that humans may take. The answers lie in hidden facts that need to be known. Would knowing the new religion come to be realized?

Marcel Pisano has written several books around the time that draw attention to religion in general, but especially the deceptive side of religion. He urges people to think about their decision to grant the churches the value that they do not deserve. Through the study and trips he has made with his research, he will demonstrate that the power of religion is starting to decrease.
