

Memory for Proper Names: A Special Issue of Memory

A growing body of research suggests that there is a specific cognitive deficit in the retrieval of proper names as compared with the retrieval of object names and other words. This special issue brings together studies that analyse the nature of retrieval failure for proper names and evaluate whether a common memory system can adequately account for the representation and retrieval of both proper and common names. The contributions reflect experimental, ecological, developmental, neuropsychological and computational approaches.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
