

The Manx Shearwater (Poyser Monographs)

The Manx Shearwater must rank amongst the worlds most evocative seabirds. Whether it be seen slicing the wave tips of a stormy sea or uttering its weird strident cry in the night sky above a breeding colony, it has all the magic that a bird lover could wish for - and many of the characteristics that make seabirds of such interest to biologists. For the better part of 17 years Michael Brooke has studied Manx Shearwaters at their Atlantic colonies. A number of expeditions have also enabled him to investigate at first hand other shearwater and petrel species in many isolated parts of the world. In this book he describes the fruits of his own and other research, synthesizing a wealth of data for the scientist and amateur alike. The breeding biology, vocal behaviour, transequatorial migrations and population dynamics of the bird are described in detail and comparisons are drawn with other shearwaters and petrels, to show how the various species have adapted to local conditions worldwide. Delightful vignettes by Dafila Scott complete this enthralling book. Jacket painting by Peter Harrison

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
