

Relationship-Centered Practices in Early Childhood: Working with Families, Infants, and Young Children at Risk

Strong working relationships with diverse families and children are the foundation of successful early intervention. Discover fresh, practical ways to build these relationships in this essential guidebook, every professional's blueprint for working with children and families within the specific context of their culture, family structure, and risk factors. Developed by two respected early childhood authorities—special education expert Gail Ensher and pediatrician David Clark—this book is a must for all professionals serving families of children birth to age 8 who have disabilities or who may be at risk. Presenting a clear framework for effective relationship-centered care in natural environments, Ensher and Clark give readers the up-to-date information and guidance they need to meet AAP guidelines and IDEA requirements for family-centered care, and address the new OSEP requirement that programs report how early intervention services have helped families and children respond appropriately to the different types of family diversity they'll encounter in their day-to-day work. Enhance their current models for early intervention in natural environments, such as coaching, consultation, and routines-based early intervention, empower families to skillfully sustain and extend care long after early intervention services are complete, improve teamwork and communication with a wide range of other professionals across disciplines and agencies, inform their practice with the most current demographic information, all in one convenient volume.

>p> With dozens of engaging photos, case studies, anecdotes from parents and professionals, and a helpful list of resources for working with at-risk families, readers will get vivid insights that will help them to put relationship-centered care into practice. And the chapter highlights and thought-provoking discussion questions

make this book ideal for university courses or independent study. A must have for every early childhood professional working within today's changing family landscape, this book is the ultimate guide to relationship-centered care that improves both child and family outcomes. Invaluable insights on different types of family diversity: Family structures. Get a better understanding of teen parents, older mothers and fathers, same-sex parents, single parents, and more. Risk factors. Manage the effects of factors like substance abuse, natural and man-made disasters, homelessness, family member loss, and child abuse and neglect. Child-related challenges. Address the ongoing effects of prematurity, disability, and sibling concerns. Cultural backgrounds. Strengthen interactions with families from specific cultural backgrounds, and learn how culture might inform families' perspectives on early intervention and medical treatment.

NEWAGEOFTRUTH There's been too many lies and not enough truth stay updated via rss MY NEW PLAYLIST Why are some looking forward to the end of days? Posted: July 26, 2016 in Cheating, Education, Evil, Politics, Religion, Social Issues Tags: Armageddon, bible, Christianity, Conspiracy theory, Prophecy, Y2K 0 end of days Some temptations are just too good to pass up. My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
