

Indian Blood: HIV and Colonial Trauma in San Francisco's Two-Spirit Community (Indigenous Confluences)

The first book to examine the correlation between mixed-race identity and HIV/AIDS among Native American gay men and transgendered people, *Indian Blood* provides an analysis of the emerging and often contested LGBTQ two-spirit identification as it relates to public health and mixed-race identity. Prior to contact with European settlers, most Native American tribes held their two-spirit members in high esteem, even considering them spiritually advanced. However, after contact - and religious conversion - attitudes changed and social and cultural support networks were ruptured. This discrimination led to a breakdown in traditional values, beliefs, and practices, which in turn pushed many two-spirit members to participate in high-risk behaviors. The result is a disproportionate number of two-spirit members who currently test positive for HIV. Using surveys, focus groups, and community discussions to examine the experiences of HIV-positive members of San Francisco's two-spirit community, *Indian Blood* provides an innovative approach to understanding how colonization continues to affect American Indian communities and opens a series of crucial dialogues in the fields of Native American studies, public health, queer studies, and critical mixed-race studies.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
