

TPL Dataflow by Example: Dataflow and Reactive Programming in .Net

The TPL Dataflow Library allows you to design asynchronous Actor and Dataflow based applications. While similar to Microsofts Reactive Extensions, it goes far beyond what is offered by Rx with a more generalized abstraction to build all types of stream based applications. It does not force you to use IObservable and LINQ, data is simply a stream. Messages transmit data from one block to another over links. Blocks handle the details of multithreading and execute anytime they receive data. All you have to think about is programming the blocks to do what you want. Focus on the problem domain not asynchronous details. Downloadable code examples are used throughout the book to explain the library with a hands-on approach (<http://DataflowBook.com>).

NEWAGEOFTRUTH There's been too many lies and not enough truth stay updated via rss MY NEW PLAYLIST Why are some looking forward to the end of days? Posted: July 26, 2016 in Cheating, Education, Evil, Politics, Religion, Social Issues Tags: Armageddon, bible, Christianity, Conspiracy theory, Prophecy, Y2K 0 end of days Some temptations are just too good to pass up. My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
