

Grandpappys Survival Manual for Hard Times, Second Edition

This is the book that is mentioned on the grandpappy.org Hard Times Survival website. This is the Second Edition of this book and it contains all the information in the First Edition plus all the hard times survival information posted on the grandpappy.org website since the First Edition of this book was published. This book contains practical advice on how to survive an economic depression or a natural or manmade disaster that disrupts commerce. During these types of events there will be no welfare services because the government will be broke. And there be no charity handouts because nobody will have anything to spare. Therefore the only person you will be able to depend on will be yourself. That's the purpose of this survival manual -- to provide you with the knowledge of what to do, why to do it, and what to reasonably expect as the result. This survival manual contains information of timeless value. It is the type of book you will pass on to your children and grandchildren. The reason is simple. This book contains detailed instructions on how to do all the following tasks if you should ever need to: (1) How to make soap using rainwater, campfire ashes, and animal fat. The instructions in this manual are unique and the process that is described is not the method your ancestors used. It is a scientifically superior process that was developed by an engineer. (2) How to make (cast) your own lead bullets using the wheel weights off the wheels of old cars in a junkyard. (3) How to construct a high quality bow and arrows using a knife plus the appropriate raw materials you can find in nature. (4) How to find water and how to make that water safe to drink in a variety of different environments. (5) How to grow food from seed and how to grow seed from that food. Once you understand how this process works then you can provide your own food for an unlimited number of years into the future. (6) How to preserve food

for winter consumption without electricity or food canning jars using three simple old-fashioned methods. (7) How to build a safe temporary shelter to protect your family from the weather and from predatory wild animals. This is not the type of shelter that is described in wilderness survival manuals. (8) How to build an underground log cabin for long-term survival if the need should arise. It is easy to find information on how to build a traditional underground home but this manual explains the best way to use pine logs to build an underground cabin cave. (9) How to build a simple solar power generator for about \$280 so you can easily recharge the batteries in your cell phone, radio, flashlight, and portable computer. This survival manual is a true bargain at its current price.

NEWAGEOFTRUTH There's been too many lies and not enough truth stay updated via rss MY NEW PLAYLIST Why are some looking forward to the end of days? Posted: July 26, 2016 in Cheating, Education, Evil, Politics, Religion, Social Issues Tags: Armageddon, bible, Christianity, Conspiracy theory, Prophecy, Y2K 0 end of days Some temptations are just too good to pass up. My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
