

The New Way to Activate Nature's Operating Code of Our Body (book): Singularity, Wearables and Fitness (The Singularity Series Book 1)

Technology is the immediate culprit in the crime of us turning into a Homo-Sloth. Throughout history, as technology evolved, the intensity of our daily physical activity declined. The author brilliantly reviews human evolution up to the stage of singularity, into the ongoing process by which man became a passive sedentary entity, who sits themselves to death. The good news, though, is that the authors surprising and refreshing analysis suggest that this is just about to change. The old technology consist of enormous number of devices and machines, which are dedicated serving staff for the Homo sapiens who turned into pampered, refined, sterile and spoilt brats. But, as the Singularity process will be ongoing, this would generate, obviously, numerous implications for our lives. One of them will be that the new generation of technology- appliances, gadgets and machines, will stop functioning as separate assistants to humans, but, in fact, be an incorporated part of us. This is not science fiction, but the beginning of a current reality. The transformation of the homo-sapiens into a techno-sapiens is the most drastic change ever happened to mankind since humans started to walk straight and began to adopt a conscious and social thinking. This new technology will bring ongoing moderately coherent physical activity back into our lives. The man will become a kind of a walking fitness entity and resultantly, the whole concept of medical awareness and fitness behavior, as we know them today, will be completely different, and probably much better.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
