With this handsome atlas in your hands, you'll discover so many new things. And you'll do so faster, and more enjoyably, and with a level of complete trust that only Readers Digest can provide. -224 maps created using state-of-the-art digital mapping techniques. -Vibrant 3-D landscape modelling combined with a large-page format offers an unparalleled view of our planet. -Updated political maps and a new section of maps on the Earth's vegetation zones. -Thematic features explain the farthest reaches of space; the formation of planet Earth; the world's oceans; and the workings of the weather. -A feature on the art of mapmaking explains the ways in which projections of the spherical surface of the Earth are represented on a flat surface and how cartographers layer data and integrate those layers to create maps. -Comprehensive index of more than 100,000 entries helps you to quickly find the largest cities, the smallest villages, the biggest deserts, the highest mountains. -An A to Z gazetteer of all the world's 242 countries and autonomous territories features population figures, official languages, flags, capital cities and major resources and industries. -Stunning
