

# Complete, Responsive, Mobile App Design Using Visual Studio: Integrating MySQL Database into your web page

You can use MS Visual Studio for mobile, database driven, app design This EBook is aimed at anyone interested in creating responsive, database connected, web apps with the visual development tools provided by Visual Studio. The version used in this EBook is 2010 Professional and Net3.5, although the techniques and code will work well for the more current versions including Express The database version is MySQL with additional references to MSSQL, or Transact SQL (T-SQL) if you prefer This app makes use of Javascript functionality to provide the responsive capabilities to adapt to various formats Using the approach which combines Javascript and Cascading Style Sheets you can create as many separate mobile, tablet, and desktop configurations as desired The finished product at the end of this book is an app that allows mileage tracking along the Appalachian Trail and displays pictures and details corresponding to the current location Upon completing this programming experience, you will be prepared to customize this code for any exercise program that your company may desire. The ability to see such scenery and details can enrich any exercise program and motivate all types of people.

NEWAGEOFTRUTH There's been too many lies and not enough truth stay updated via rss MY NEW PLAYLIST Why are some looking forward to the end of days? Posted: July 26, 2016 in Cheating, Education, Evil, Politics, Religion, Social Issues Tags: Armageddon, bible, Christianity, Conspiracy theory, Prophecy, Y2K 0 end of days Some temptations are just to good to pass up. My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
