

# Management Information Systems (Oxford Higher Education)

Management Information Systems is a comprehensive textbook designed to meet the needs of post graduate management students. The book elaborates on how information systems (IS), supported by information technology (IT), help businesses gain competitive advantage and meet corporate objectives. Divided into five parts, the first part Concepts and Structures of MIS elaborates on the basic concepts of IS, strategic advantage of IT, and corporate decision making. The second part IT Infrastructure covers various hardware, software, database, and telecommunication components. The third part Business Applications throws light on enterprise applications, enterprise systems, electronic commerce. Special care has been taken to explain decision support systems, knowledge management, and intelligent systems. The fourth part Development of MIS underlines IS planning and development and implementing IT solutions. The last part Management and Challenges of MIS touches upon the societal impact of IT, security aspects, and explains IS in the context of managing global businesses. With its problem-solving approach and user-friendly presentation, the book will be useful to management students as well as professionals.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
