

The Digital Cast of Being: Metaphysics, Mathematics, Cartesianism, Cybernetics, Capitalism, Communication

We live surrounded by countless digital gadgets and navigate through cyberspace as if it were the most natural thing in the world. This digital cast of being, however, comes from a long history of philosophical and mathematical thinking in which the Western will to productive power over movement has attained its consummation. This study traces the digital dissolution of beings from the Pythagoreans, Plato and Aristotles ontology via Cartesian mathematical science, through to our digitized economy and telecommunications. The book also includes an appendix that reinterprets quantum mechanical indeterminacy phenomenologically.
