

## Globalization and Everyday Life (The New Sociology)

Globalization and Everyday Life provides an accessible account of globalization by developing two themes in particular. First, globalization is an outcome of structural and cultural processes that manifest in different ways in economy, politics, culture and organizations. So the globalized world is increasingly heterogeneous, unequal and conflictual rather than integrated and ordered. Secondly, globalization is sustained and created by the everyday actions of people and institutions. Both of these have far-reaching consequences for everyday life and are fully explored in this volume. Larry Ray skilfully guides students through the various aspects of the globalization debate and illustrates key arguments with reference to specific topics including nation, state and cosmopolitanism, virtual societies, transnationals and development. This innovative book provides this information in a clear and concise manner suitable for the undergraduate student studying sociology, social geography, globalization and development studies.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
