

Creative Space: Models of Creative Processes for the Knowledge Civilization Age (Studies in Computational Intelligence)

Creative Space summarizes and integrates the various up-to-date approaches of computational intelligence to knowledge and technology creation including the specific novel feature of utilizing the creative abilities of the human mind, such as tacit knowledge, emotions and instincts, and intuition. It analyzes several important approaches of this new paradigm such as the Shinayakana Systems Approach, the organizational knowledge creation theory, in particular SECI Spiral, and the Rational Theory of Intuition resulting in the concept of Creative Space. This monograph presents and analyzes in detail this new concept together with its ontology the list and meanings of the analyzed nodes of this space and of the character of transitions linking these nodes.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
