

Intranet Performance Management (Advanced & Emerging Communications Technologies)

To avoid serious bottlenecks, components of the Internet and of intranets—such as servers, browsers, and the access networks—must be properly designed, implemented, managed, and monitored. Beginning with the basics, *Intranet Performance Management* sets forth the standards, methods, and tools that can simplify and unify systems and network management, avoid the seemingly inherent problems associated with them, and contain costs. In this book, world-renowned expert Kornel Terplan addresses: Proactive server, browser, and access network monitoring; Managing and authoring home page content; Traffic management and load balancing in the access networks; Reviewing and evaluating usage statistics using log files. These tasks—essential to the success of an intranet—require the active and diligent work of the management team. Effective performance of these tasks allows for the use of inexpensive browsers, facilitates education, and improves Internet culture and scalability.

NEWAGEOFTRUTH There's been too many lies and not enough truth stay updated via rss MY NEW PLAYLIST Why are some looking forward to the end of days? Posted: July 26, 2016 in Cheating, Education, Evil, Politics, Religion, Social Issues Tags: Armageddon, bible, Christianity, Conspiracy theory, Prophecy, Y2K 0 end of days Some temptations are just too good to pass up. My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
