U.S. Marine Corps Close Combat: Fleet Marine Forces Manual provides the methodology & techniques of the Marine Corps system of Close Combat (MCSOCC). The MCSOCC uses a specific system to teach Marines the skills required to defeat an opponent in close combat. Close combat is the physical confrontation between two or more opponents. It involves armed and unarmed and lethal and nonlethal fighting techniques that range from enforced compliance to deadly force. The purpose of close combat is to execute armed and unarmed techniques to produce both lethal and nonlethal results. Unarmed techniques include hand-to-hand combat and defense against hand-held weapons. Armed techniques include techniques applied with a rifle, bayonet, knife, baton, or any weapon of opportunity. Well written, with many illustrations. Soldiers Handbook For Individual Operations Survival In Cold Weather Areas: This handbook is an aid for soldiers in cold climates.
