

Intranet as Groupware

Build groupware capabilities into your intranet without expensive commercial groupware products. Intranet technology is an inexpensive and easier-to-use alternative to groupware products like Lotus Notes and Groupwise. But simply installing an intranet doesn't automatically endow an organization with collaborative computing. In *Intranet as Groupware*, intranet pioneer Mellanie Hills shows you how to take that crucial next step. With the experiences of 13 leading companies, including JC Penney, AT&T, Bell Atlantic, EDS, Texas Instruments, and Turner Broadcasting, she:

- * Shows you what you can do with groupware on an intranet
- * Examines intranet groupware products as well as Web-enabled proprietary groupware
- * Provides step-by-step guidelines and checklists for planning and implementing intranet groupware
- * Discusses how to overcome the people and change issues that make groupware difficult to implement

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
