

The Effective Tax Burden on Highly Qualified Employees: An International Comparison (ZEW Economic Studies)

Taxes on the highly skilled are an important cost factor for companies competing internationally for talent. This book provides an international comparison of the effective level of taxes and social security charges imposed on highly qualified employees. Based on a newly developed inter-temporal simulation model, the attractiveness of 7 EU member states, 12 Swiss cantons, and the United States is assessed. Several compensation packages including old-age provision, fringe benefits, and long-term incentives as well as various income levels and family situations are considered in the analysis. The book also contains a comprehensive survey of social security and tax systems in the countries studied.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
