The parallels between the human brain and computers is easy to see today. But in the 1950s when John Lilly developed his theory of the human biocomputer, this was a dramatic new way of viewing humans. Much like a driver can step out of the car, we are not our biocomputer. The Self is something far greater and more mysterious. Rooted in his extensive knowledge of neurophysiology, neuroanatomy and electronics and developed through personal experimentation in the sensory isolation tank which he invented, Lilly presents a method for learning to manipulate to drive the bio-robot, which is our vehicle here on Earth. robots. This manual shows how to step out of the mind-body and find out who we really are.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
