

Dreams: A Key To Self-knowledge (Personality Assessment Series)

This book presents a dream interpretation system based on the percept-analytic principles pioneered by the late Zygmunt Piotrowski. The Perceptanalytic Dream System (PDS) is an effective tool for PDS analysis. Dream events are evaluated as though they were observed consciously, bringing to the surface all of an individuals intrapsychic incompatibilities, reactions to conflicts and frustrations, and conscious and unconscious images of conflict resolution. These images are translated into verbal language through this unique method of transcribing the unconscious in conscious terms.
