

Mastering Mathematica, Second Edition: Programming Methods and Applications

This new edition of Mastering Mathematica focuses on using Mathematica as a programming language, because programming in Mathematica is the best way to use the software to its fullest capacity. The book covers functional programming, imperative programming, rewrite programming, and object-oriented programming. It also addresses the use of Mathematica as a symbolic manipulator and a general tool for knowledge representation.* Focus on four different types of programming styles with Mathematica: functional programming, rewrite (or rule-based) programming, imperative (or procedural) programming, and object-oriented programming, with many examples of each style* Compatible with Mathematica 3.0 and its programming language* Chapters on graphics programming show how to make the most of the considerable graphics capabilities of Mathematica* Includes coverage of programming needed for creation of Mathematica packages that allow a user to extend the language as needed for particular uses* Applications include:* Polya pattern analysis* Critical points of functions* Object-oriented graph theory* Minimal surfaces* Mathematica-Enhanced CD-ROM Enclosed* Complete text in active Mathematica Notebook files, enhanced for v3.0; Allows you to evaluate complex examples without retyping; Extensive use of the v3.0 math typesetting system* Hyperlink index and table of contents * Instant access to any chapter or topic* Index is automatically merged with the main Mathematica help system forming a master index of all the users Mathematica related information; Quickly see listings on a given topic from The Mathematica Book, Mastering Mathematica, the Guide to Standard Packages, or any other Help Browser aware books you have installed

NEWAGEOFTRUTH There's been too many lies and not enough truth stay updated via rss MY NEW PLAYLIST Why are some looking forward to the end of days? Posted: July 26, 2016 in Cheating, Education, Evil, Politics, Religion, Social Issues Tags: Armageddon, bible, Christianity, Conspiracy theory, Prophecy, Y2K 0 end of days Some temptations are just to good to pass up. My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
