

## What to Eat Now: Autumn and Winter

In the accompanying BBC2 programme, What to Eat Now, Valentine Warner took us on a mouth-watering, content-rich and beautifully filmed journey through the best of autumnal food. He charted the growth of his favorite foods from their first stirrings as seeds through to fully grown foods. Natural history filming techniques will capture the life-cycle of everything from rabbit to mackerel to pumpkin. The programme then follows Valentine as he brings each ingredient back from the river, sea, woodland and field, shore or highland and launches it into ovens, pans and barbecues. He cooks 3-4 dishes in each episode, both indoors and out.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
