

Aspertools: The Practical Guide for Understanding and Embracing Aspergers, Autism Spectrum Disorders, and Neurodiversity

If you ask Dr. Harold Reitman, labels are a lousy way to describe a unique human being, whether its Aspergers, high functioning autism, ADHD, dyslexia, Tourettes or even the so-called neurotypical brain itself. One size does not fit all. Everyones brain is different. Helping others get it when it comes to dealing with those with so-called learning disabilities is why Reitman has written this book. Its also why he wrote and produced The Square Root of 2, a movie about a college student who encounters and fights her schools unjust system. The film was inspired by the real events faced by his daughter and contributing author, Rebecca, when she went to college; her seizure disorder and at the time undiagnosed Asperger syndrome posed unique challenges not faced by most students. After reviewing the scientific communitys research, conducted over the last nearly 40 years, Dr. Reitman believes that its time to not just accept neurodiversity, but to embrace it, and this book will help people do just that. It is the first book to offer simple tools, action plans and resources to help understand and deal with anyone whose brain is a bit different. The astonishing rate of autism births alone (1 in 68) means that society will have to adapt to neurodiversity, just as it has had to adapt to other cultural and racial differences. Our educational system, our workplaces, and society at large will no longer be one size fits all each individual will have the opportunity to maximize their potential and we will be the better for it.

My curiosity got the best of me the other day and I gave in by watching one of those "End of the World" conspiracies videos. This time around the date is set for July 29, 2016. So in three days the biblical prophecies will come true and we will be swallowed up by hell fire while the others who are "saved" will rejoice in the heavens.
